

# Process Measurement & Control Webinar

*The Process Measurement & Control Webinar is a two-hour live web training that provides a solid foundation for your basic controls and process measurement knowledge. You will learn why it's important to measure and control a process to reduce variability and increase profits.*

What's the best part about the Process Measurement & Control Webinar? There is no travel required and **you can earn two (2) professional development hours!** You will be able to apply what you learn in the course directly back into your workplace.

**After two hours, you will understand:**

- The overall process measurement & controls architecture
- What instruments are used to measure key parameters
- The major elements of a typical process control loop
- Controller actions & the importance of tuning control loops
- Various control schemes & implementation to reduce the variability of a process
- The evolution of process measurement & control

The Process Measurement & Control Webinar lasts two hours, starting at 10:00 AM Pacific Time (1 PM Eastern Time), ending with a question and answer session. If there is anything you would like to ask the speaker, simply email your questions directly to the panel or join in on the discussion by using the WebEx client.

Course materials will be provided upon the completion of the course. Accredited registrants must track their points and submit activities to their state's licensing board. Please keep a copy of the Course Certificate to submit if asked for proof of completion.

**ESI Certified Instructors**

Our trainers are hand-picked to present our seminars based on their dynamic speaking abilities and industry expertise. These seasoned professionals have years of hands-on experience in the industry and have provided thousands of hours of instruction.

**Your registration entitles you to:**

- A single invitation to attend the 120-minute webinar
- A copy of the presentation in PDF format
- One Completion Certificate per purchase awarding **two (2) professional development hours**
- The opportunity to connect with the speaker during the Q&A

**Who Should Attend?**
